- kk. The embodiment shown in Fig. 34;
- ll. The embodiment shown in Fig. 35;
- mm. The embodiment shown in Fig.36;
- nn. The embodiment shown in Fig. 37; and,

oo. The embodiment shown in Fig. 38.

The species are independent or distinct because they are disclosed as alternative embodiments and have patentably distinct features.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete **must include (i) an election of a species** or invention to be examined even though the requirement be traversed (37 CFR 1.143) **and (ii) identification of the claims** encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant's response filed 03 MAR 06 provisionally elected Species "b", the embodiment shown in Figure 1B, however, examiner failed to clearly state that Applicant must identify the claims readable on the elected species. Because the response appears to be a bona fide attempt, examiner will not hold the restriction final at this time, but rather, will allow Applicant to respond to this restriction requirement, which clearly states the requirements.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bret C. Hayes whose telephone number is (571) 272 6902. The examiner can normally be reached on M-F 5:30 am to 4:00 pm.
